What did you contribute to this class?

Comments
I engaged in class conversations and answered questions appropriately.
in class conversation
It was a lecture styled course, so I did not need to contribute.
Asking questions about the topics In class, and presenting at the end of the semester.
Participated.
Participation and sometimes asked questions.
Actively engaged in class and raised my hand. I asked questions and I worked well with my peers.
I participated in in–class discussion
Taking notes and being studious
class disscussion
I contributed a study partner to peers in the class that further helped us all excel in the course
Engagement & thoughtful questions
.
I participated a lot in class and answered questions when the professor asked then.
I contributed answers to questions and points of discussion.
My knowledge of economics contributed to understanding how economics worked in the medical world
attendance and class participation
An informational presentation on a problematic topic in the US
I asked questions for clarity and sought outside help and showed an interest in the subject.

What from this class will change your approach to the subject, the discipline, or the world?

| Comments |
| --- |
| I now have a grasp of the ins and outs of health insurance, and this will prepare me for the future. |
| my understanding of healthcare and doctor training |
| Knowledge of the US Healthcare system |
| Helped me understand how health insurance, supply, and demand are handled throughout the US, compared to other countries. |
| Learned a lot more about health care systems. HD is a good teacher. |
| I have a better understanding of the economics within the health industry. |
| This class was something I was genuinely interested in.I learned so much and learned how messy the healthcare system is |
| I will think differently about the importance to maintain good health |
| I now understand more about the economics of both the poor and rich health care system |
| I would change how the courses written. I felt like that was not enough grades to make up for harder topics |
| This class pertains to the career path I'm interested in and provided a better understanding of the industry as a whole. |
| The U.S. healthcare system needs to be reformed |
| . |
| I have a new perspective about insurance plans in the United States and around the world. I also learned about the health care system. |
| This class helped me to understand the large world of healthcare and economics. |
| My understanding of the costs and expenses of medical world |
| This class really opened my eyes to health care overall. Being a senior I will soon have to begin choosing my own health insurance. Professor HD did a marvelous job of talking about the differences in different health care coverage plans and how that effects a lot of other externalities |
| More of an understanding for those in the adverse positions of our healthcare systems |
| It has changed my outlook on the role of economist and what they can do. |

Please explain why you rated the quality of Professor Dao's instruction in this course as you did. (Paraphrased)

| Comments |
|---|
| Professor Dao does a great job of keeping students engaged with topics, but it seems as if he struggles with understanding student's questions sometimes. |
| it was fine |
| He explained the course concepts very well |
| Professor Dao only taught from the book and lectured all class long and would often go over the end of class time. He is a very kind and intelligent guy and I think he has a bright future in teaching, but he needs to learn how to keep the class engaged and some more experience. |
| He's the man. Great teacher. |
| He explained the content in a easy way and was also very reasonable when it came to assignments. |
| Genuinely the coolest, nicest econ professor and I am so luck I had the opportunity to learn from him. |
| He is very smart and knows the subject but he could be better and inspiring students. I never really was motivated by him to do well. |
| Professor Dao always shows up for class ready to go and seems like he really enjoys teaching |
| Professor HD is super nice and taught the course really well. I would only recommend is having a attendance policy |
| Professor Dao was always well–prepared in class and opened up to us in the spirit of learning numerously class in and class out. |
| Professor Dao covered a lot of material over the semester which was good, but also hard to keep up with. |
| . |
| Professor Dao's instruction in this course is good because he is always prepared for class and has a lot of information to be share. |
| He was a decent professor, just his presentation in class often left me questioning how well he was prepared or ready to teach us things about the course content. Also, some of his lecture styles were not engaging which made it hard to get anything out of the lectures. |
| He was prepared for class and seemed to have lots of knowledge on the material he was covering. |
| Professor HD really cares about what he is teaching. His class lectures are always planned out and very easy to follow. He doesn't leave any detail out and goes at a great speed so everyone can follow along. His notes translate to the homework which then translate to the exams. I felt very prepared for all the Homeworks and Exams that we took this semester. |
| I felt that Professor Dao knew what he was talking about however i wish he put more of a personalized understanding on the topic |
| Professor Dao was my favorite Professor this semester. He presented all the course material in a digestible way for students and is willing to alter class speed based on students understanding. |

The course materials (e.g., books, printed materials, videos, online sources, natural resources, lab materials) are well-chosen for this class.

What do you appreciate most about this course?

Comments
I appreciate the push of teaching us real world examples of health insurance and how it is necessary for us to learn.
real life application
It's thoroughness on the course material
The end of semester presentation, because we got to put all we learned together and apply it to a foreign country.
HD. Good information taught by HD.
Understanding more about the world of economics.
The new knowledge I have that is actually applicable in my life choices.
HDs flexibility
Professor Dao
na
The contrasting perspectives of buyers vs sellers pertaining to insurance plans
Dr. Dao is very helpful and wants the best for his students.
.
The content is super interesting
I appreciated the scheduling of the course.
Real world application
The presentation were a lot of fun to do and use what we learned in class to apply it to specific areas of interest
Independent learning
Professor Dao's (HD) care for my learning.

If you could change one or more specific things about this course, what would they be?

Comments
I would change the grading weight distribution, since the final project was over half the weight of our final grade.
not sure
N/a
Professor Dao's method of teaching.
Not much. HD did a great job.
Maybe do some other things in class besides just taking notes.
nothing.
Id make the class more interactive.
I wouldnt
na
N/a
I would slow down the pace a bit more
.
Different modes of instruction other than just lecture and video – maybe more engaging.
I would change the grading schedule, felt a little back–loaded which made it hard to get points at the beginning of the class where the most information was taught.
Lectures to be more hands on
nothing honestly , the course was perfectly paced and we covered some great topics
More quizzes, maybe weekly or biweekly
N/A
